## CAMBRIDGE

INTERNATIONAL EXAMINATIONS

NOVEMBER 2001

ADVANCED SUBSIDIARY LEVEL

## MARK SCHEME

## MAXIMUM MARK : 25

## SYLLABUS/COMPONENT : 8701/3

CHEMISTRY
(Extended)

|  | AS Level Examinations - June 2001 | 8701 | 3 |

N.B. Boxed references within this marking scheme relate to the accompanying booklet of Standing Instructions

## 1 (a) Titration Table

## Titration table

Give two marks if:
all final burette readings are to 2 decimal places,
at least two recorded volumes of FC 2 added are within $0.10 \mathrm{~cm}^{3}$,
there is no error in subtraction in the table and an appropriate average has been calculated (a tick on a single titre is acceptable).

Deduct one mark for each error in the above (no negative marks).
Use (g) to calculate the Candidate's average, if this is necessary

## Accuracy

See section (g).

Assign accuracy marks by comparing the candidate's average titre (corrected as necessary) with the
Supervisor's value.
Apply spread penalty as shown below

| Accuracy marks |  |
| :---: | :---: |
| Mark | Difference from Supervisor $/ \mathrm{cm}^{3}$ |
| 8 | up to 0.10 |
| 7 | $0.10+$ to 0.15 |
| 6 | $0.15+$ to 0.20 |
| 5 | $0.20+$ to 0.30 |
| 4 | $0.30+$ to 0.40 |
| 3 | $0.40+$ to 0.60 |
| 2 | $0.60+$ to 0.80 |
| 1 | $0.80+$ to 1.00 |
| 0 | Greater than 1.00 |

| Spread Penalty |  |  |  |
| :---: | :---: | :---: | :---: |
| Range used $/ \mathrm{cm}^{3}$ | Deduction |  |  |
| $0.20+$ to 0.25 | 1 |  |  |
| $0.25+$ to 0.30 | 2 |  |  |
| $0.30+$ to 0.40 | 3 |  |  |
| $0.40+$ to 0.50 | 4 |  |  |
| $0.50+$ to 0.60 | 5 |  |  |
| $0.60+$ to 0.80 | 6 |  |  |
| $0.80+$ to 1.00 | 7 |  |  |
| Greater than 1.00 | 8 |  |  |
|  |  |  |  |

## Suspect Supervisor Values

Adopt procedure (ii) in (h) for any suspect Supervisor results
If there is not an obvious value from the Candidates' results, use 23.40 as the Standard Value. Report your action to Team Leader on the Centre Accuracy Return.

|  | IGCSE Examinations - June 2001 | $\mathbf{8 7 0 1}$ | $\mathbf{3}$ |

In all calculations, ignore evaluation errors if working is shown
(b) Give one mark for $\frac{\text { Titre }}{1000} \times 0.125$
(c) Give one mark for Answer to (b) $x 0.5$
(d) Give one mark for Answer to (c) $x \frac{1000}{25}$ or $\frac{\text { Titre } \times 0.125}{25.0 \times X}=\frac{2}{1}$
(e) Give one mark for Answer to (d) x $106.0 \quad 1$
(f) $\quad$ Give one mark for $\quad 16.75$ - Answer to (e) 1

|  | AS Level Examinations - June 2001 | 8701 | 3 |

2 FC 5 is a solution containing $\mathrm{Pb}^{2+}, \mathrm{Zn}^{2+}, \mathrm{NO}_{3}{ }^{-}$

|  | Test | Observations [5] | Deductions [4] |
| :---: | :---: | :---: | :---: |
| (a) | To 2 cm depth of FC 3 in a test-tube, add dilute nitric acid. | No reaction one mark <br> No colour change <br> No precipitate <br> No gas evolved | Not $\mathrm{CO}_{3}{ }^{2-}, \mathrm{SO}_{3}{ }^{2-}$ or $\mathrm{NO}_{2}{ }^{-}$ one mark <br> This deduction can only be made from no reaction or no gas (evolved) <br> ( $\mathrm{No} \mathrm{CrO}{ }_{4}{ }^{2-}$ is wrong - colour) |
| (b) | To 2 cm depth of FC 3 in a boiling-tube, add aqueous sodium hydroxide. <br> Warm the solution. | White precipitate <br> Soluble in excess <br> one mark <br> (from both observations) <br> No ammonia <br> or <br> no positive test for ammonia described) one mark | $\mathrm{Al}^{3+}, \mathrm{Pb}^{2+}$ or $\mathrm{Zn}^{2+}$ one mark (from both observations) <br> No $\mathrm{NH}_{4}{ }^{+}$ one mark Allow this deduction from no gas (evolved) or gas having no effect on litmus paper |
| (c) | Cool the solution remaining from test (b), add aluminium foil and cautiously warm again. | Ammonia one mark <br> Test for ammonia described one mark | $\mathrm{NO}_{3}{ }^{-}$or $\mathrm{NO}_{2}{ }^{-}$one mark |
| (d) | To 2 cm depth of FC 3 in a test-tube, add aqueous potassium iodide. | Yellow precipitate one mark | $\mathrm{Pb}^{2+} \quad$ one mark |
| (e) | To 2 cm depth of FC 3 in a boiling-tube, add dilute aqueous ammonia until in excess. <br> Filter the mixture and then add dilute nitric acid drop by drop to neutralise the solution and then in excess. | White precipitate. <br> one mark <br> White precipitate. <br> Soluble or partially soluble (excess). one mark (from both observations) | Ignore any ions from white precipitate <br> $\mathrm{Zn}^{2+}$ <br> one mark |

Give one mark if all three ions are correctly identified in the summary:

## Summary

FC 3 contains the cations and the anion
$\mathrm{Pb}^{2+}$ and $\mathrm{Zn}^{2+}$
$\mathrm{NO}_{3}{ }^{-}$

Total of 15 scoring points
If the mark is in excess of 10 cross through the mark and record 10 max.
Total for Question 2 is 10 and for the Paper 25.
