SOURCE A

Source A is taken from 'Morning Glass', the autobiography of professional surfer Mike Doyle. In this extract, he describes his introduction to the world of surfing at the beach near his home in California in the 1950s.

The picture shows five men surfing on a large wave.

- 1 The first time I ever saw somebody riding a surfboard was at the Manhattan Pier in 1953. As much time as I'd spent at the beach, you'd think I would have at least seen one surfer before then.**
- 5 But there were only a few dozen surfers in all of California at that time and, like surfers today, they were out at dawn surfing the morning glass. By the time the crowds arrived, they were gone.**

- 10 But this one morning I took the first bus to the beach, walked out onto the Manhattan Pier, looked down and saw these bronzed gods, all in incredibly good shape, happier and healthier than anybody I'd**
- 13 ever seen.**

15 They sat astride their boards, laughing with each other; at the first swell they swung their long boards around, dropped to their stomachs, and began paddling towards shore. From my viewpoint, it was almost as if I were on the board myself, paddling for the swell, sliding into the wave, coming to my feet, 20 and angling the board down that long wall of green water. It was almost as if I already knew that feeling in my bones. From that day on, I knew that surfing was for me.

25 There were several surfers out that day. Greg Noll was just a kid then, about sixteen years old, but he was hot. On one wave he turned around backward on his board, showing off a bit for the people watching from the pier. I was just dazzled.

30 Once I'd discovered there was such a thing as surfing, I began plotting my chance to try it. I used to stand out in the surf and wait until one of the surfers lost his board. The boards then were eleven feet long, twenty-four inches wide and weighed fifty or sixty pounds. When they washed in broadside, 35 they would hit me in the legs and knock me over. I would jump back up, scramble the board around, hop on, and paddle it ten feet before the owner snatched it back – 'Thanks, kid' – and paddled away.

[Turn over]

40 Most surfers at that time were riding either hollow
paddle-boards (a wooden framework with a plywood
shell), or solid redwood slabs, some of them twelve
feet long. The much lighter and much better balsa
wood boards were just starting to appear.

45 One day in 1954, when I was thirteen, I was down at
Manhattan Pier watching a guy ride a huge old-
fashioned paddle-board – what we used to call a
kook box. It was hollow, made of mahogany, about
fourteen feet long, maybe sixty-five pounds and had
50 no fin. It was the kind of paddle-board lifeguards
used for rescues; they worked fine for that purpose,
but for surfing they were unbelievably awkward.
When the guy came out of the water, dragging the
board behind him, I asked if I could borrow it for a
55 while. He looked at me like ‘Get lost, kid.’ But when
he sat down on the beach, I pestered him until he
finally shrugged and nodded toward the board.

I’d watched enough surfing by then to have a pretty
clear idea of the technique involved. I dragged the
60 board into the water and flopped on top of it. After a
while I managed to paddle the thing out beyond the
shore break and got it turned around. To my
surprise, after a few awkward tries, I managed to get
that big, clumsy thing going left on a three foot
65 wave. I came to my feet, right foot forward, just like
riding a scooter. I had no way of turning the board
but for a few brief seconds, I was gliding over the
water.

70 As the wave started to break behind me, I looked back, then completely panicked. I hadn't thought that far ahead yet! My first impulse was to bail out, so I jumped out in front of the board, spread-eagled. I washed up on the beach, dragged myself onto the dry sand, and lay there groaning.

[Turn over for Source B]

SOURCE B

In 1875, the British explorer Isabella Bird travelled to Hawaii, an island in the Pacific Ocean.

Source B is an extract from a letter she wrote to her sister back in England, describing a visit to the Hawaiian town of Hilo. At that time in Britain surfing, or 'surf-bathing', was a completely unknown sport.

1 Our host came in to say that a grand display of the national sport of surf-bathing was going on, and a large party of us went down to the beach for two hours to enjoy it. It is really a most exciting
5 pastime, and in a rough sea requires immense nerve. The surf-board is a tough plank of wood shaped like a coffin lid, about two feet broad, and from six to nine feet long, well-oiled and cared for. They are usually made of wood from the native
10 breadfruit tree, and then blessed in a simple ritual.

The surf was very heavy and favourable, and legions of local people were swimming and splashing in the sea, though not more than forty had their Papa-he-nalu, or 'wave sliding boards,'
15 with them. The men, each carrying their own hand-carved boards under their arms, waded out from some rocks on which the sea was breaking, and, pushing their boards before them, swam out to the first line of breakers*, and then diving down were
20 seen no more till they re-appeared half a mile from shore.

What they seek is a very high breaker, on the top of which they leap from behind, lying face downwards on their boards. As the wave speeds on, and the
25 bottom strikes the ground, the top breaks into a huge comber*. The swimmers appeared posing themselves on its highest edge by dexterous movements of their hands and feet, keeping just at the top of the curl, but always apparently coming
30 down hill with a slanting motion.

31 So they rode in majestically, always just ahead of the breaker, carried shorewards by its mighty impulse at the rate of forty miles an hour, as the more daring riders knelt and even stood on their
35 surf-boards, waving their arms and uttering exultant cries. They were always apparently on the verge of engulfment by the fierce breaker whose towering white crest was ever above and just behind them, but just as one expected to see them dashed to
40 pieces, they either waded quietly ashore, or sliding off their boards, dived under the surf, and were next seen far out at sea, as a number of heads bobbing about like corks in smooth water, preparing for
44 fresh exploits.

45 The great art seems to be to mount the breaker precisely at the right time, and to keep exactly on its curl just before it breaks. Two or three athletes, who stood erect on their boards as they swept exultingly shorewards, were received with ringing
50 cheers by the crowd. Many of the less expert failed to throw themselves on the crest, and slid back into smooth water, or were caught in the breakers which

[Turn over]

were fully ten feet high, and after being rolled over
and over, disappeared amidst roars of laughter, and
55 shouts from the shore.

At first I held my breath in terror, thinking they were
smothered or dashed to pieces, and then in a few
seconds I saw the dark heads of the objects of my
anxiety bobbing about behind the breakers waiting
60 for another chance. The shore was thronged with
spectators, and the presence of the elite of Hilo
stimulated the swimmers to wonderful exploits. I
enjoyed the afternoon thoroughly.

Is it always afternoon here, I wonder? The sea was
65 so blue, the sunlight so soft, the air so sweet. There
was no toil, clang, or hurry. People were all
holidaymaking, and enjoying themselves, the surf-
bathers in the sea, and hundreds of gaily-dressed
men and women galloping on the beach. It was so
70 serene and tropical. I envy those who remain for
ever on such enchanted shores.

GLOSSARY

* breaker/comber – terms used by surfers for a large
wave that breaks into white foam
